Supplementary Figure and Figure legend

Supplementary Figure S1. Relative gene expression intensities between GM-BMDCs, GM-BMMs and M-BMMs (a) Classical DC-specific gene expression levels of Zbtb46, Flt3, Kit and Ccr7 microarray results were compared. Error bars, SEM, *, p<0.05, **, p<0.005 analyzed by student t-test, n=2. (b) Gene expression levels of CD80 and CD86 microarray results were compared. Error bars, SEM, *, p<0.05 analyzed by student t-test, n=2.
